

RDS Print Interceptor

Smart print routing for multiple output devices

PDF capture • page routing • RAW output

1 HOW IT WORKS

User prints once

RDS Print Interceptor captures the job

Pages are routed automatically

Multiple output printers receive the correct pages

2 ROUTE ONE JOB TO MULTIPLE DEVICES

Output 1:
Pages 1-2

Output 2:
Pages 3-6

Output 3:
Pages 7-10

Split a single print job across multiple printers automatically.

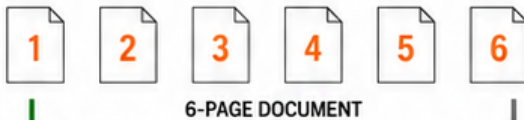

3 DUPLICATE PAGES WHEN NEEDED

Page order example: 1,1,2,2,3,3

Useful when you need two copies of selected pages.

4 SELECTIVE PAGES PER DEVICE

6-PAGE DOCUMENT

Colour Printer

Page 1
-> Colour Printer

Mono Printer

Pages 2-6
-> Mono Printer

Send cover pages, letterheads, or special pages to a different device.

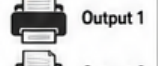

5 PAGE-COUNT RULES

Automatic routing based on total page count

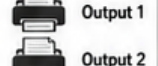

If total pages = 3
-> send all pages to Output 1

If total pages = 6
-> pages 1-2 to Output 1,
pages 3-6 to Output 2

If total pages = 9
-> pages 1-3 to Output 1,
pages 4-6 to Output 2,
pages 7-9 to Output 3

6 IDEAL FOR

Production printing

Invoice and document workflows

Mixed colour / mono output

Automatic distribution to multiple printers

Print once. Route intelligently. Deliver automatically.

RDS Print Interceptor helps businesses save time and automate complex print workflows.
